Engaged in the BilgeAdam Boost program, a six-month vocational training aligned with my career objectives, I'm gaining a holistic understanding of theoretical concepts and practical applications using cutting-edge technologies. This program uniquely emphasizes hands-on experience through project development, allowing me to showcase my proficiency in both theoretical knowledge and practical skills. After successfully graduated from the program by having the opportunity to develop a projects **which can seen the projects and the technologies used in the education part.**

Education

Software

BilgeAdam Academy Boost Programming(Graduated) - Istanbul

- After my graduation from Industrial Engineering I worked couple years and decided to pursue my goal in the first place so I quit and started my education in the BilgeAdam Boost Program.
- Here we developed real-time projects and used the below principles and languages in these projects:

ASP.NET MVC · ASP.NET Web API · ASP.NET AJAX · Microsoft SQL Server · React Native · HTML5 · Object-Oriented Programming (OOP), Windows Form, CSS

- **King Burger Web Project :** In this project, we tried the build a web side that used by MVC project in the mean time we tried to build a layered architect which is secure. Basically there is an admin page who can add menu and products to the app and users can modify the order.

Technology and Principles used: C#, .NET Framework/Core, HTML, CSS, Asp.Net AJAX, JavaScript, NET Framework/Core, Entity Framework, Git with MSSQL database

- **Diet App -** Developed a comprehensive diet application to track nutritional intake, monitor progress, and provide personalized recommendations for users.

Technology and Principles used: C#, .NET Framework/Core, Entity Framework, Windows Form, Git with MSSQL database

- **Restaurant App -** Designed and implemented a user-friendly restaurant application, enabling customers to browse menus, place orders, and enjoy a seamless dining experience.

Technology and Principles used: C#, .NET Framework/Core, Entity Framework, Git with MSSQL database

- **Record Store App** - The main section displays a comprehensive album list with details such as name, artist, release date, price, discount, and availability status. Additional features include lists for discontinued albums, ongoing sales, the latest 10 additions, and albums on discount, sorted by discount rate with the admin interface

Technology and Principles used: C#, .NET Framework/Core(ORM), Entity Framework,Windows Form Git with MSSQL database

- **Coffee Order Simulation -** The application showcases a detailed album inventory, presenting key information like name, artist, release date, price, discount, and availability status. It offers additional functionalities, including lists for discontinued items, ongoing sales, the latest additions, and discounted albums, sorted by discount rates.

Technology and Principles used: C#, .NET Framework/Core, Entity Framework, Git with MSSQL database

Bachelor of Science: Industrial Engineering | ENGLISH
